

# TWINFLEXpro

## Introducing the next generation in 2-wire fire alarm technology.

This versatile panel incorporates Fike's Multipoint detection system using smoke and heat detectors with built in sounder, allowing the whole system to be installed using only one pair of wires per zone.

**Fike**<sup>®</sup>

### Key Features

- 4 line x 20 character LCD display
- Ability to differentiate between call point and detector alarms
- Checkpoint alarm verification
- Available in 2,4 or 8 zone versions
- Event log storing 500 events
- 32 devices per zone
- 3 enhanced test modes

### Ideal for

- Apartments/Flats
- Hotels/B&B's
- Restaurants
- Office Buildings
- Retail Stores
- Local Museums
- Warehouses
